LTS

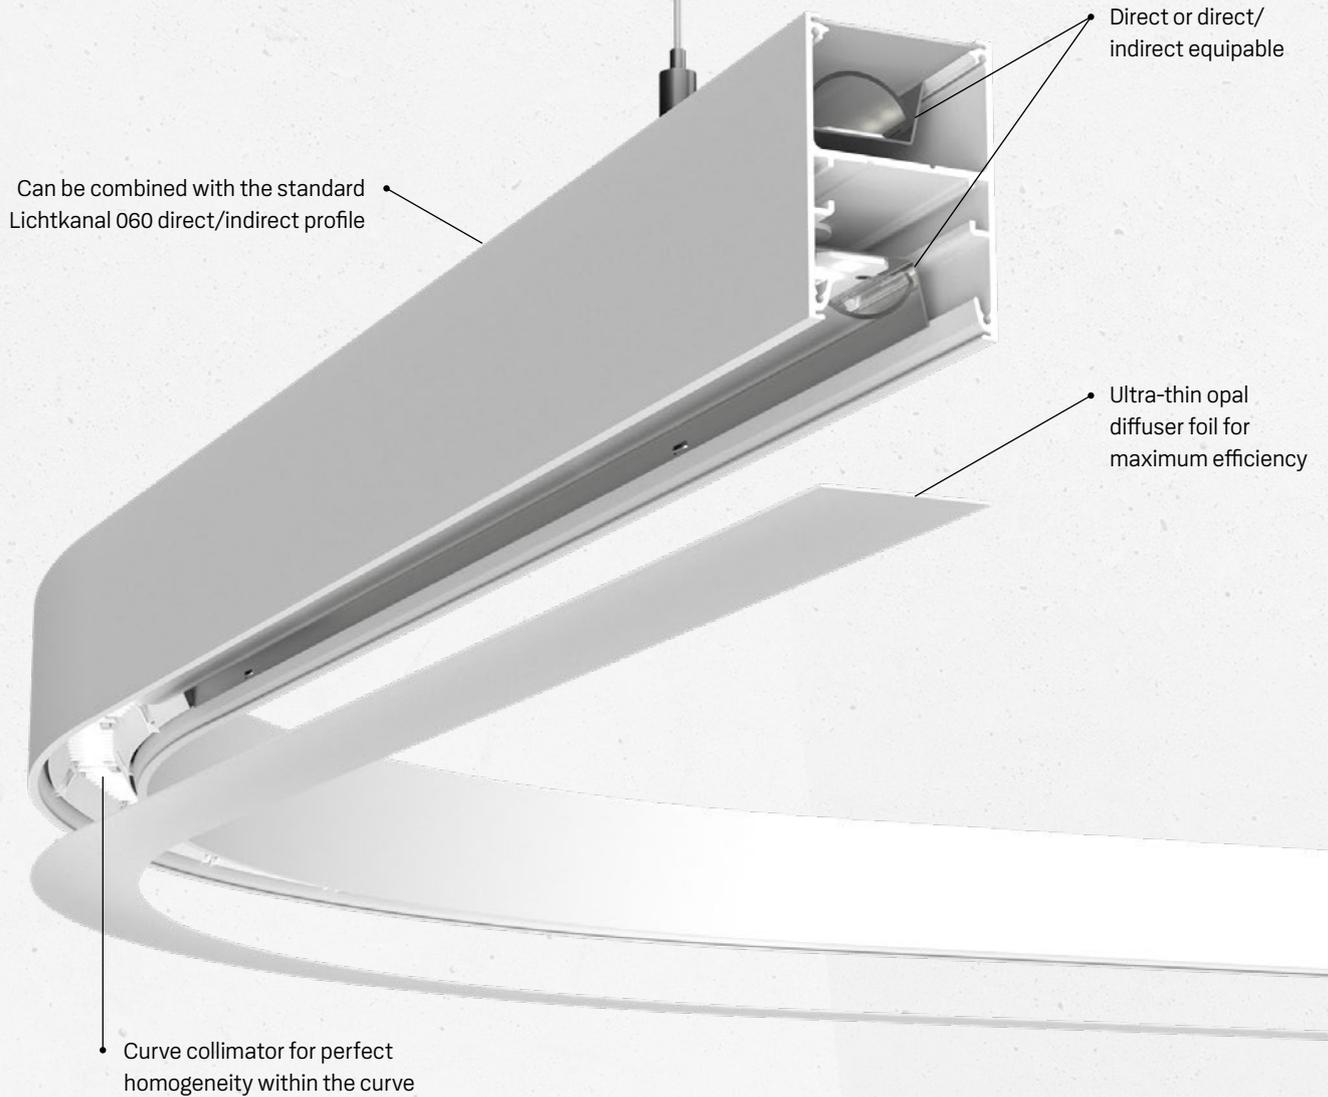

LIMITLESS LIGHT CURVED LIGHT

LTS has taken a new, curvy approach to lighting and transformed Lichtkanal 060, moving away from a straight line towards a dynamic shape. The smooth design of Lichtkanal Curved creates new architectural scope for modern interior design. It either blends harmoniously into organic interiors or offers a strong contrast, a visual highlight in linear architecture.

There are no limits to lighting design! With consistent light quality and the proven efficiency of Lichtkanal 060 more than 120 lm/W, Lichtkanal Curved is an exceptionally flexible system which creates the necessary planning and design freedom.

The possibility of direct/indirect lighting or purely direct lighting pays to a complete lighting solution and gives the lighting concept a special character, which contributes to a perfect lighting solution.

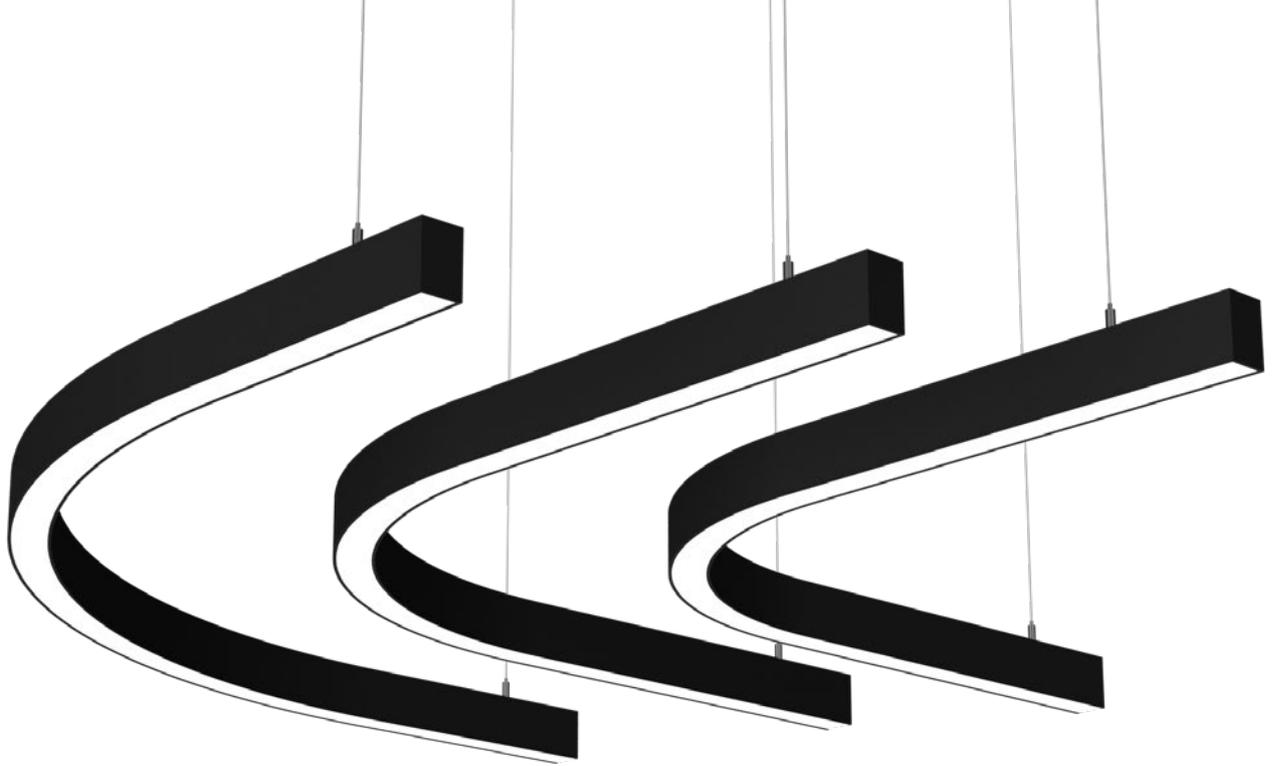

FLEXIBLE AND UNLIMITED

LK CURVED

A successful endeavour – thanks to the curve collimators developed by LTS. They are capable of directing linear light in the shape of a curve absolutely homogeneously which has the enormous benefit that all the advantages of the standard Lichtkanal 060, such as light quality, efficiency, light colour, colour reproduction, homogeneity and controllability equally apply to the curved version.

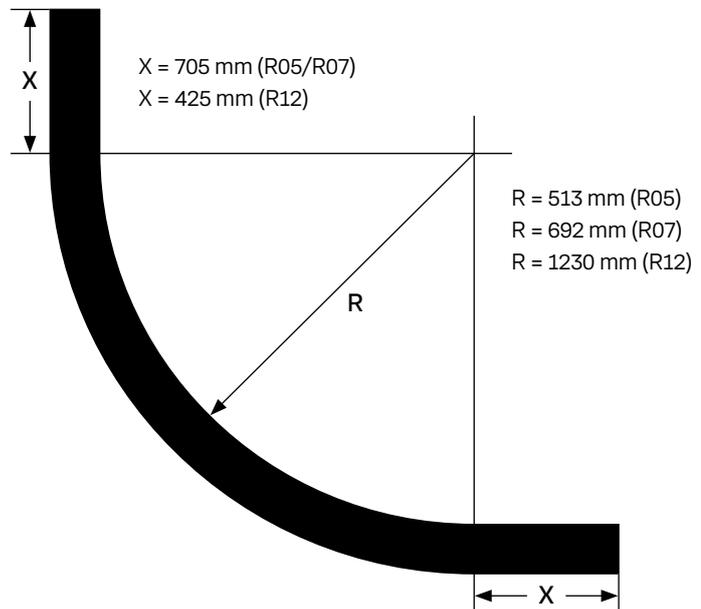

The H profile of Lichtkanal 060 is available in three different radii of 513mm, 692mm and 1230mm. Individual radii are also possible on request. Lichtkanal Curved means no more limits to planning and design.

	LK CURVED R05	LK CURVED R07	LK CURVED R12
SYSTEM POWER	max. 45,3 W	max. 53,6 W	max. 78,3 W
LUMINOUS FLUX AT 4000 K	5480	6470	9460
