HIGHEST VISUAL COMFORT  
DESIGNED FOR THE FUTURE

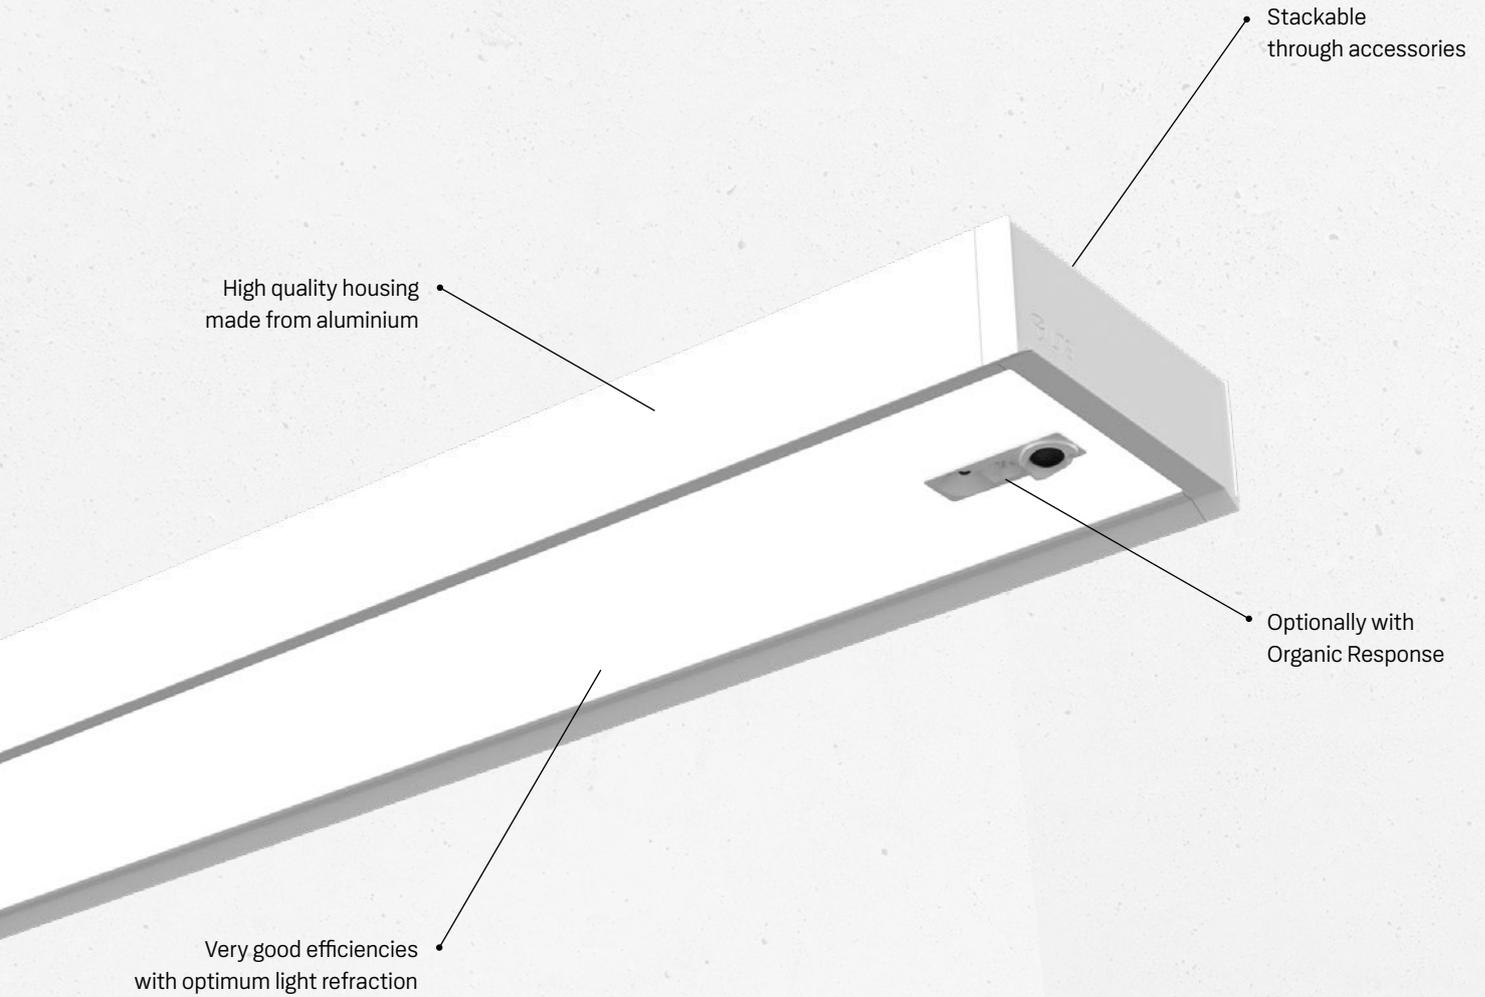

LTS

# FLEXIBLE IN THE OFFICE

## MODULAR AND VERSATILE FOR PRODUCTIVE WORK

The Mila workplace luminaire captivates with its clear form and timeless design. As a stylistically straight and clean light element, this pendant or surface-mounted luminaire meets all kinds of workplace requirements and is a visually appealing solution for any office. Smallest micro-pyramid structures of the acrylic glass provide for even, symmetrical light distribution and optimally refracted light. The excellent glare control ( $UGR < 19$ ) combined with highest efficiency of over 150 lm/watt give the luminaire a competitive edge. In the pendant version, the 1500 mm long office all-rounder additionally offers the option of lining them up in a modular way. The luminaires are simply connected with the help of an accessory and a continuous row adapted to the length of the room is created. For the direct/indirect distribution luminaire LTS uses a sustainable recent development. The cover of the indirect light component is made of 100% recycled plastic.

# LIGHT OF TOMORROW FOR THE OFFICE OF TODAY

## MILA

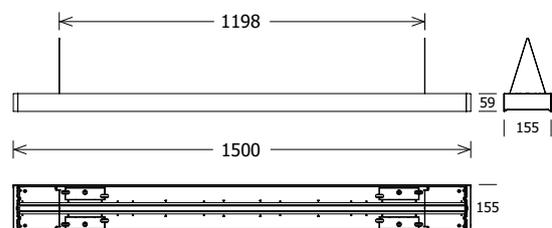

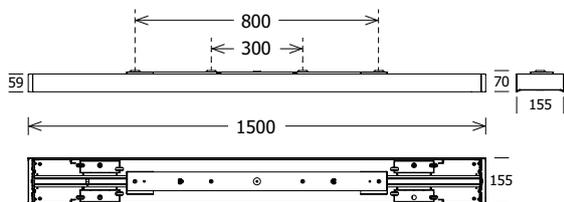

---

Mila's low energy consumption, its very good efficiency and long service life reduce operating costs and also the associated CO2 emissions. LTS is continuously researching the development of innovative, sustainable materials and components. Mila has been researched and developed especially for the office market at LTS on Lake Constance and is produced at LTS' home base in Tettngang. Another step by the LTS research department towards a more sustainable future.
