

More about
renovation

LTS replaces your old lighting fixtures with a new, efficient LED variant and offers the additional service of correct recycling and disposal of the individual components.

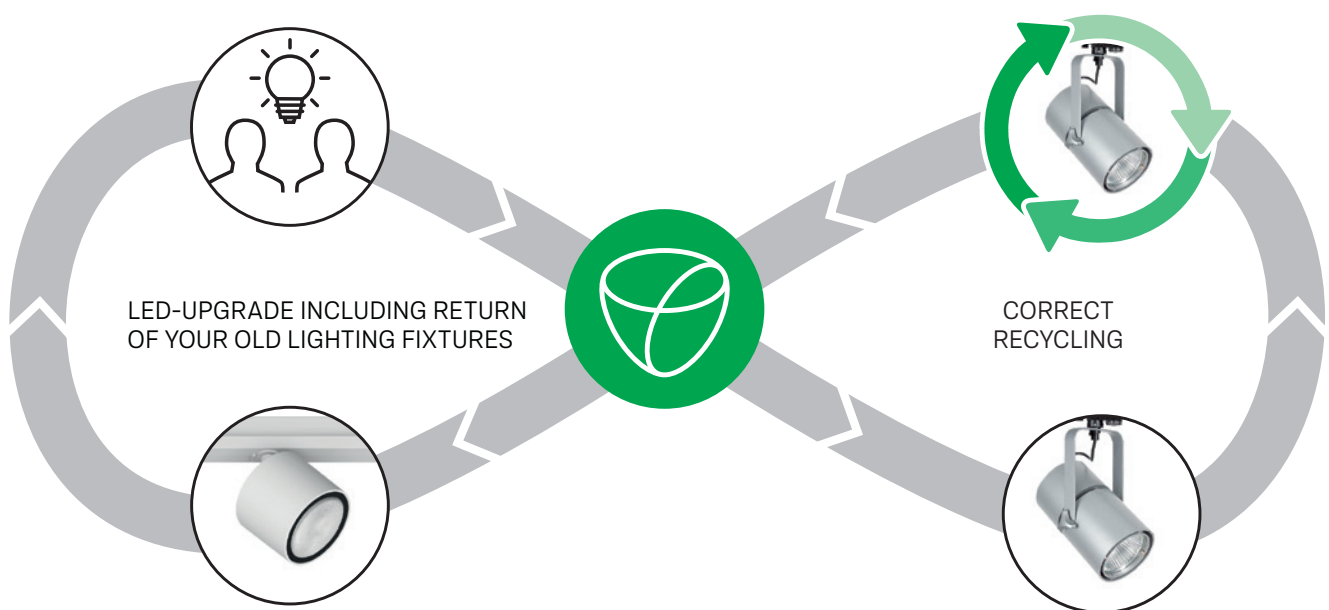

RESPONSIBLE LIGHTING RENOVATION

RENOVATING LIGHTING RECYCLING RAW MATERIALS

You have installed lighting and now want to upgrade it with the latest LED luminaires from LTS?
We are happy to take your old LTS-luminaires back and ensure the correct recycling and disposal of the individual components.

No matter whether you want to renovate only individual light spots or the entire lighting system, don't hesitate to contact us. Also upgrading LED luminaires of the first generation can already pay off! We will help you make the right decision for your LED upgrade.

Our 360° LTS light service for you

- Personal assistance by lighting specialists, including a payback calculation and advice on funding schemes
- Customised solutions for every renovation project
- Correct disassembly of your old LTS-luminaires, returning of individual components to the recycling system and disposal of hazardous substances through the Lightcycle return system with a certified partner
- Repair services beyond the normal warranty period

If you already have LTS lighting, ask for a non-binding individual offer for a replacement and return concept.
The return of any third-party luminaires is to be evaluated individually.
